Ferrule fuse-links 10x38 aM 400 to 690VAC

IEC Cylindrical Fuse-Links

Mersen aM and gG fuse-links cover a wide range of physical sizes and ampere ratings for 400, 500, and 690VAC for protection in electrical distribution circuits and various industrial applications. Most ratings are available in size 8x31 and size 10x38 with an optional indicator, and in size 14x51 and 22x58 with an optional striker to activate an auxiliary contact. All cylindrical fuse-links have ceramic bodies and silver-plated ferrules.

Cylindrical fuse-links “aM” are partial range fuses. They protect electrical devices in case of unacceptable high short-circuit against destruction due high current limiting and low thermal let-through values. They cut off currents more than 6.3xIn until the maximum breaking capacity (rated breaking capacity). Cylindrical fuse-links “aM” are mainly used for the protection of installation switch gear in otor circuit currents. For classification of the cylindrical fuse-links the nominal current of the fuse-link can be selected respective to the nominal current of the motor.

Our technology and process was designed to ensure highly reliable technical performance.

Features Benefits

- Small size
- Visual blown fuse indication
- Safest and most reliable protection system
- optional indicator

Applications

- aM type for protection of motors, transformers and other loads with in-rush currents.

Technical data overview

Voltage Range AC	400 ... 690 VAC
Ampere Range (A)	0.16 ... 32 A
Speed/Characteristic	aM
I.R. AC (kA)	120 kA
Body Material	Ceramic
Contact Materials	Silver plated copper
Product Size	10x38 mm

Standards

IEC 60269-1 & -2

Approved by Lloyd’s Register of Shipping and Bureau Veritas

MERSEN reserves the right to change, update or correct, without notice, any information contained in this datasheet.

Ferrule fuse-links 10x38 aM 400 to 690VAC

Product range

Size 10,3x38 400/500VAC without indicator
